WEST HEMPSTEAD WATER DISTRICT JOINS AQUASAFE

Following the unveiling of our Pilot Program at the Nassau Suffolk Water Commissioners' Association Dinner earlier this year, West Hempstead Water District signed on to participate in the program and successfully completed its Pilot. AquaSafe is excited to welcome the West Hempstead Water District as an official customer beginning this month.

Throughout the pilot, the district worked closely with our team to evaluate the platform and provide valuable feedback, helping demonstrate how AquaSafe can simplify water quality data management workflows. We look forward to supporting West Hempstead as they continue leveraging AquaSafe to manage water quality data with confidence.

NYSAWWA'S ONE WATER WORKFORCE PARTNERS WITH AQUASAFE

Following a NYSAWWA workshop this past summer, AquaSafe and NYSAWWA's One Water Workforce (OWW) are officially partnering to help water utilities strengthen succession planning and workforce development.

The workshop highlighted the need to prepare the next generation of water professionals while preserving institutional knowledge through succession planning, knowledge transfer, and operational continuity.

AquaSafe's role in supporting these efforts received overwhelmingly positive feedback. Together, AquaSafe and OWW look forward to helping water systems pair the OWW Succession Planning Toolkit with technology that supports long-term operational success.
